Why Workday

Workday is an on-demand (cloud-based) software vendor that specializes in enterprise resource planning, financial management and human capital management applications.

Proven public sector experience

Over 50 public sector organizations use Workday, employing over 400,000 workers across the country. Workday customers include six state governments and several city and county governments with populations of more than 500,000 people.

World-class security

Applications designed specifically for the cloud, such as Workday, have proven to meet the requirements of organizations in the most heavily regulated and risk-averse industries worldwide.
- The cloud offers secure gateways for data access to protect sensitive information.
- Security measures prevent data loss and ensure proper authentication of user access to the system.

Predictable cost model

Workday is delivered through a subscription-based, predictable cost model that includes services not found in traditional licensing models. These include configurable and actionable analytics, secure data backups, mobile solutions, regulatory compliance updates, disaster recovery, third-party data integrations, and ongoing software maintenance.

The Power of One

Workday delivers one security model, one source for data, one user experience and one community.
